SUEZ INTRODUCES NEW PFAS TESTING CAPABILITY AT ANALYTICAL LAB IN TOMBALL, TEXAS

SUEZ - Water Technologies & Solutions today announced the expansion of its PFAS service offerings in Tomball, Texas. With a new capability to analyze water samples for ultra-low, trace levels of PFAS, SUEZ can now identify the specific types of PFAS present in customers' water, then create a customized treatment plan to best remediate the contamination. SUEZ's lab uses the same advanced testing equipment and processes as certified PFAS testing labs, providing customers with a cost effective, efficient, and convenient testing option.

"PFAS is one of the biggest concerns in drinking water today. The expansion of our PFAS service offerings makes SUEZ a true one-stop shop for PFAS testing and treatment, ultimately enabling us to better meet customers' needs through a holistic approach to dealing with PFAS issues," said John Peichel, Global Market Development at SUEZ – Water Technologies & Solutions. "We can now identify the specific types of PFAS compounds customers' are dealing with and develop a customized treatment plan using a broad range of technologies to best address the specific PFAS issue."

SUEZ offers a broad range of PFAS removal and remediation technologies to address contamination in industrial and municipal applications. For more information on PFAS treatment strategies and the technologies available, visit www.SUEZWaterTechnologies.com/Applications/PFAS-Remediation.

About SUEZ:

Since the end of the 19th century, SUEZ has built expertise aimed at helping people to constantly improve their quality of life by protecting their health and supporting economic growth. With an active presence on five continents, SUEZ and its 90,000 employees strive to preserve our environment's natural capital: water, soil, and air. SUEZ provides innovative and resilient solutions in water management, waste recovery, site remediation and air treatment, optimizing municipalities' and industries' resource management through "smart" cities and improving their environmental and economic performance. The Group delivers sanitation services to 64 million people and produces 7.1 billion m³ of drinking water. SUEZ is also a contributor to economic growth, with more than 200,000 jobs created directly and indirectly on an annual basis, and a provider of new resources, with 4.2 million tons of secondary raw materials produced. By 2030, the Group is targeting 100% sustainable solutions, with a positive impact on our environment, health and climate. SUEZ generated total revenue of €17,2 billion in 2020.
